SKILLS SUMMARY

Languages: Java, Python, C, C++
Frameworks & Libraries: HTML and CSS, NodeJS, React
Databases: PostgreSQL, MongoDB
Developer Tools: Git, GitHub, IntelliJ
Soft Skills: Detail-Oriented, Strategic Problem-planning, Adaptability, Team Management

INTERNSHIP

Software Development Intern — Horizon Tech | Certificate Oct 2025 – Dec 2025

- Required a method to optimize backend data processing → restructured core algorithms using Python and Java → decreased overall system processing time by 15% and eliminated critical memory leaks.
- Needed to improve the user interface for client dashboards → collaborated with the design team to implement responsive HTML, CSS, and JavaScript components → increased mobile user engagement by 25%.

PROJECTS

Assistive Walking Stick Prototype — Smart Mobility Aid | GitHub | Live April 2026 – May 2026

- Engineered — a reliable mobility solution designed to detect environmental hazards and prevent accidents, utilizing an ESP32 microcontroller as the core processing unit.
- Integrated an MPU6050 sensor pipeline with ultrasonic and water detection modules, resulting in real-time fall and obstacle identification.
- Developed an automated emergency alert mechanism via the Telegram API, instantly broadcasting notifications to designated contacts upon fall detection.

Tech Stack: ESP32, C/C++, MPU6050, Ultrasonic Sensors, Telegram API

Thermoelectric Generator System — Waste heat recovery | GitHub | Live Nov 2025 – Dec 2025

- Architected — a sustainable power generation system engineered to capture wasted thermal energy and convert it into usable electricity.
- Analyzed Seebeck coefficients to optimize thermoelectric module efficiency and integrated custom boost converters to step up variable low-voltage inputs.
- Stabilized the final electrical output to a consistent voltage, establishing a functional proof-of-concept for localized, low-power energy harvesting.

Tech Stack: C/C++, Thermoelectric Modules, Boost Converters, Circuit Design, Power Electronics

TRAINING

Cloud Architecture & Scalability – NPTEL Guided Program | Certificate Jan 2026 – Apr 2026

- Assigned to architect a fault-tolerant web application deployment → configured simulated virtual instances and load balancers → achieved 99.9% uptime during guided server stress-testing scenarios.
- Directed to optimize cloud storage costs for large datasets → designed automated data lifecycle policies transitioning stale data to cold storage → reduced projected monthly infrastructure overhead by 30%.

Tech Stack: Cloud Computing, Distributed Systems, Server Infrastructure, Python

CERTIFICATIONS / CERTIFICATES

C Programming NeoColab	June 2026
DSA Programming NeoColab	June 2026
Python Programming NeoColab	Dec 2025

EXTRACURRICULAR ACTIVITIES

Working as a part-time motion video editor.	December 2022 – Present
Competed professionally in eSports, qualifying for the LIDOMA series Asia zone.	June 2025

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor Of Technology — Computer Science and Engineering: CGPA: 8.1	August 2025 – Present
G.M. Public School	Gomoh, Jharkhand
Senior Secondary (Class XII) — Percentage: 78	April 2024 – April 2025
De Nobili School	Maithon, Jharkhand
Secondary (Class X) — Percentage: 91	April 2022 – March 2023
